FastAPI, PHP, Python, Java,

C# (.NET)

JavaScript, HTML, CSS,

Tailwind CSS, Bootstrap, Vite

REST APIs, PostgreSQL,

SQLite, MongoDB

LANGUAGES

- ENGLISH
- PERSIAN
- AZERI
- TURKISH

ABOUT ME

I am an Applied Computer Science student who approaches software development as a balance between structure and creativity. I continuously develop my skills through hands-on projects using Laravel, FastAPI, and modern frontend technologies. I enjoy combining technical problem-solving with creativity to build solutions that adapt to real user needs, particularly in web platforms and data-driven systems.

HOBBIES

Outside of my studies, I spend my time doing charcoal portrait drawings, reading classic literature, bodybuilding, and learning new languages. I'm always ready to learn quickly, adapt, and give my best in everything I do.

PROJECTS

- **Grow Gym - Fitness Management Platform:** Team Laravel/Livewire project implementing training plans, progress tracking, and role-based workflows.
- **ARRISE - Rehabilitation Platform:** TALL-stack Laravel application with role-based dashboards, clinical reporting, PDF generation, and email system.
- **NitroDrive - Carshop:** Full-stack web app with REST API integration

WORK EXPERIENCE

Kitchen Crew - McDonald's Geel

Working in a fast-paced environment requiring speed, accuracy, and teamwork

Kitchen Staff - Rinkven Golfclub (Albatros Restaurant)

Supported kitchen operations in a high-standard hospitality environment, contributing to large events and strict quality expectations.

Event Staff - Thomas More

Hellow Yellow festival setup crew at Thomas More
